DETAILED ACTION

Allowable Subject Matter

1. Claims 1-18 are allowable over the prior art of record.

The following is an examiner's statement of reasons for allowance: The prior art of record fails to teach or render obvious a light emitting diode having all limitations as recited in claims 1, 5, 9, and 14, comprising a substrate, a first conductivity type GaN lower cladding layer directly over the substrate, an InGaN light emitting layer directly over the lower cladding layer, a second conductivity type GaN upper cladding layer directly over the light emitting layer, a contact layer over the light emitting layer, an AlGaInSnO system transparent conducting oxide layer as a light transmitting layer directly over the contact layer, a second electrode formed over the light transmitting layer, and a first electrode formed on an exposed portion of the lower cladding layer or formed underneath the substrate.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Art Unit: 2818

- a) Yamamoto et al. U.S. Patent 6,569,548 disclose a transparent conductive film of zinc oxide.
- b) Yang et al. U.S. Patent Application Publication 20050082558 disclose a light-emitting device with a current blocking structure extending from the bottom surface of the ohmic contact electrode to the light-emitting layer.
